ABOUT ME

Programming enthusiast studying in the third year of the computer engineering specialization programme, interested in competitive coding as much as web development. Always ready to dive head down to new technologies. Passionate about embracing the change

EDUCATION

Feb 2022 - Present

Bachelor of Science in Computer Engineering

University of Ruhuna

Relevant Coursework: Software Development, Web Development, Data Structures & Algorithms, Object-Oriented Programming, Machine Learning, Databases, Design Patterns

PROJECTS

2024

Spare Part Sales and Service Platform (Ongoing) | Team Project

Developed a platform for a spare part selling and service business, allowing users to browse and purchase spare parts, view service details, and schedule appointments online. The solution offers a user-friendly experience for both customers and the business, streamlining service booking and product sales.

Frontend - Angular, Tailwind CSS

Backend - Spring boot

Responsibility - Full Stack Engineer

Database - MYSQL

Git Hub - <https://github.com/AmiruHoradagoda/BikePartsHubApplication/tree/develop>

2024

LecKeep V 1.0.0

Designed a CRUD-based note-taking app for storing lecture notes as PDFs and short notes. Implemented CI/CD pipelines using Docker and Jenkins for seamless deployment on AWS. Followed DevOps principles, including containerization and cloud hosting.

Frontend - React, Tailwind CSS

Backend - Spring boot

Database - MongoDB

DevOps Tools - Docker | Jenkins | AWS

Git Hub - <https://github.com/AmiruHoradagoda/Note-taking-app>

2024

Face Recognition App

An Developed a Python-based Face Recognition App using OpenCV for real-time gender recognition. Built the model with a Support Vector Classifier (SVC) and evaluated its performance. The project was aimed at gaining hands-on experience in image processing.

Technologies - Python ,Jupyter Notebook ,OpenCV ,Scikit-learn , NumPy

Git Hub - <https://github.com/AmiruHoradagoda/FaceRecognitionApp>

2023

Service Finder Mobile | Team Project

The Service Finder Application is a Flutter-based platform connecting local service providers with clients. It offers tailored interfaces for both parties, enabling providers to showcase services and clients to find and book them easily.

Mobile Technologies: Flutter

Backend: Firebase

Cit Hub - https://github.com/AmiruHoradagoda/service_finder_application

2023

Pharmacy Sales and Inventory Management System

Developed a full-stack pharmacy management application enabling customers to purchase medicines online, with authentication and role-based access control for admin and customer roles.

Frontend - React, Tailwind CSS

Backend - Spring boot

Database - MYSQL

Cit Hub - [Backend Repository](#), [Frontend Repository](#)

2023

Simple Point-of-Sale System

Developed a Java-based POS system with a layered architecture, following OOP design patterns for maintainability and scalability.

Tech Stack - Java | JavaFX | MySQL

Cit Hub - https://github.com/AmiruHoradagoda/simple-pos-system/tree/Apply_Layered_Architecture

Achievements

2023

IEEE Xtreme 17.0 – Secured 115th place in Sri Lanka, solving competitive coding challenges.

HaXtreme 2.0 & RED CYPHER 1.0 – Participated in coding and cybersecurity competitions.

SKILLS

Programming : Java (Skilled), JavaScript (Skilled), Python (Familiar), C++

Frontend Development: Angular, React

Backend Development: Spring Boot, Node.js, Express.js

Databases: MySQL, MongoDB

DevOps & Tools: Docker, Jenkins (Familiar), GitHub, AWS (Basic)

Concepts: OOP Design Patterns, Agile
